

NON-SLIP MATS

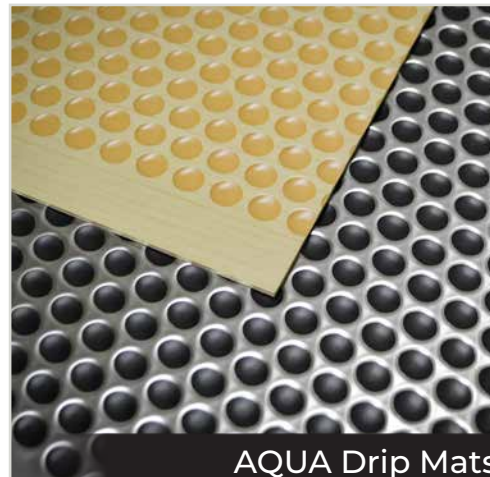

DIAMOND PLATE Design

MODERN LINE Design

PRISMA Design

AQUA Drip Mats

Features:

These high quality acoustic and slip resistant mats prevent stored items from sliding around inside the cabinet or pull-out unit. The slip resistance guarantees maximum safety, because the cut-to-size mat will always stay in place.

The use of 100% recyclable polystyrene sheets as the base material makes this product environmentally friendly and safe to be used in the food industry.

The top layer is a natural rubber with a modern design to enhance the look of your drawer interior or pull-out units.

This new composition and material structure gives this product a sealing property, which prevents any spilled liquids from seeping through into the cabinet or drawer area.
