

STAMPED STEEL OUTDOOR TABLE BASES

NOW WITH

PronToe® INCLUDED!

Our ingenious stamped steel process creates a strong and durable table base that was designed to last a lifetime. Constructed of a top plate and column welded assembly mated to a strong and durable stamped steel base assembled together with just one bolt. The base has a smooth outdoor matte black finish over a zinc undercoating making this one of the most durable bases on the market as well as one of the fastest to assemble. The Stamped Steel Outdoor Series bases are available in table and bar height and now include the patented PronToe table base leveler by Peter Meier Inc. for a new and efficient way to keep bases leveled and balanced.

**OUTDOOR
APPROVED**

EUROPEAN DESIGN. MADE FOR THE AMERICAN MARKET
